

Thank you for purchasing Oliver Packaging & Equipment Company Speedseal® Packaging System. To ensure a seamless transition with your staff and clients, Oliver Packaging & Equipment Company highly recommends completing the following steps:

- Meet with your staff and volunteers to review the system
- For meal distribution via delivery bags
  - Alternate stacking of trays
  - It is recommended to use 24-point chip board dividers between layers of trays in large delivery bags/coolers
  - Send a letter to your clients indicating the packaging changes with the following statements:

Advise your clients to:

- Refrigerate cold meals immediately
- Consume hot meals immediately or place in refrigeration

Hot meal re-heating instructions:

- Peel back lid to vent or slit film in each compartment
- Re-heat meal in microwave 2 - 3 minutes maximum on high
- Re-heat meal in conventional oven:
  - Preheat oven to 350° F
  - Place meal on baking sheet pan and re-heat in oven for 10 minutes maximum

Frozen meal re-heating instructions:

- Peel back lid to vent or slit film in each compartment
- Heat frozen meals in microwave for 3 - 5 minutes maximum
- Heat frozen meal in conventional oven
  - Preheat oven to 350° F
  - Place meal on baking sheet pan and re-heat in oven for 30 minutes maximum

NOTE: Do *not* use toaster ovens to reheat under any circumstances.
