

MODEL 311 COMPACT BAGGER QUICK START GUIDE

Congratulations on your purchase of the model 311 Compact Bagger! The small space requirements, versatility, and ease of operation will streamline your meal preparation process. Follow the steps below to get familiar with the features and operation.

WHAT'S IN THE BOX?

Your purchase will come complete with bag blowing unit, tape dispenser, universal dispenser mounting plate, and the fasteners to attach the dispenser.

SET UP AND OPERATION

1. Once all of the contents have been removed from the box you will first need to determine which side of the unit to mount the tape dispenser. The dispenser can be mounted on either the right or left side depending on your process flow.
2. Once you have chosen a side to mount the dispenser use the fasteners provide to attach the dispenser to the universal mounting plate.
3. Next, remove the two slotted screws on the base of the machine and mount the dispenser that was just attached to the universal mounting plate.

REV 1-26-2018

4. Before placing the bags on the unit, remove the cardboard backing from the top side of the wicket.

5. Select the appropriate hole spacing in which to place the wicket of bags by lifting the spring hold down and inserting the wicket into the holes.

6. Allow the hold down to release on to the bags gently and you're ready to go!

Because the model 311 compact bagger is so simple there is generally no maintenance. Use general cleaning practices to wipe down the unit if it becomes dirty.

In the event that you are having issues with your bagger please contact the Oliver Parts and Service department at 1-800-253-3893 and select option 2.
