## School Nutrition Packaging System

# School Nutrition Programs

## So Much More Than Lunch

With more than lunch on your menu, Oliver's Speedseal® Packaging System is your all-day solution. Simplify with pre-portioned sealed packaging for hot or cold school breakfasts, lunches, grab-n-go meals, and after-school snacks. And when school is out for summer, our system will keep your summer food service program moving, providing less-mess mobility for transporting to community feeding sites.

**Breakfast, Lunch, & Supper**

## Helping People Feed People

At Oliver, we understand the critical elements that matter to a school nutrition program—time, labor, resources, food budgets, nutrition, and presentation. In the dynamic landscape of school nutrition, stakeholders range from students and administration to school boards, parents, and your dedicated staff.

Introducing our Speedseal® School Nutrition Packaging Systems, offering innovative and resource-conscious products that seamlessly integrate school meal portion regulations with production efficiency and packaging presentation. Our team is committed to delivering user-friendly solutions designed to optimize your operation and reduce costs. Streamline productivity with straightforward equipment and automation and maximize food budgets through improved portion control. Our diverse tray material options allow you to meet local regulations while supporting your nutrition program and your district's sustainability initiatives.

We understand the complexities inherent in operating school nutrition programs. At Oliver, our mission is centered on empowering you to efficiently serve your students. Our goal is to earn your trust and provide unwavering support for the crucial work you do in nourishing and feeding your students.
